

The Bryan College Ward School of Nursing (WSN) is embarking on an exciting adventure in nursing education. We are launching a Bachelor of Science in Nursing (BSN) program in the Dayton, TN area and are seeking a dynamic, Christ-loving medical/surgical faculty person to join us on this journey.

We believe that nurses interact with people at their most basic levels during their times of greatest need, and so we consider nursing to be a calling, and those preparing for a calling must demonstrate both great competence and great compassion. At Bryan College BSN students will have opportunities to learn the skills and principles necessary to provide exceptional nursing care for people in need; however, they will also learn how to engage and interact with a culture that consistently challenges Jesus Christ's principles regarding birth, life and death. You will have an opportunity to help create a learning culture that not only supports innovation but expects it. You will be part of a vibrant team that is being assembled to embrace an out-of-the-box approach to the healthcare shortage in rural Tennessee and surrounding areas.

This is a 9-month medical/surgical faculty position and in order to [apply](#) you will need to:

- Have a vibrant, growing faith in Jesus Christ
- Have an earned graduate degree in nursing – preferably with a specialty in nursing education or a clinical area
- Have two years of teaching experience in nursing education
- Have at least three years of medical/surgical direct client care experience as an RN
- Be able to practice as an RN or APRN in Tennessee

Bryan College exists to educate students to become servants of Christ to make a difference in today's world. We are located on a 128-acre hilltop in Dayton, Tennessee, within the foothills of the Smoky Mountains, 35 minutes north of Chattanooga and 100 miles from Nashville or Gatlinburg.
